

TriPREP[®] Tubex[®] BMC

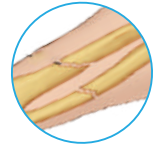

Autologous Cell Concentration System

“ Experience purity in every drop
upto 100% bone & Fat debris removal ”

What is TriPREP[®] Tubex[®] BMC?

Bone Marrow Aspirate drawn from Iliac Crest is processed with our TriPREP[®] Tubex[®] BMC kit and serves as an excellent source of multipotent cells & anti inflammatory proteins.

Osetochondral Lesions Avascular Necrosis Traumatic Bone Loss

How does it help the regenerative process?

- ◆ Concentrated stem cell load accelerates the healing potential
- ◆ Endothelial progenitor stimulate neoangiogenesis
 - Recruit bone marrow progenitor cells to focus of injury
- ◆ Mediates cell to cell adhesion
- ◆ Mediates cellular migration and wound healing

Permits 25-50 ml
Bone Marrow Concentrate

0% Risk of Contamination

Process 4-8 ml of
cellular concentrate

5-7x times increased
Cell Load from Baseline
