

TriPREP® Tubexmini® Endomterium kit

"Monthly E-PRP kit: Effective, Economical, and Enriching in just Three Shots!"

Endometrium PRP therapy uses a patient's blood to boost endometrial growth and thickness, aiding IVF success. It stimulates cell regeneration and blood vessel growth, improving the uterine lining and embryo implantation in assisted reproductive technology (ART).

Why Choose Us?

- ✓ Certified For Reinfusion
- ✓ 3-4x Higher Platelets
- ✓ Patented Technology
- ✓ 100% Sterile & Closed System
- ✓ High efficacy with zero platelet loss

- ✗ Diagnostic purpose only
